

EXPERIMENT 7

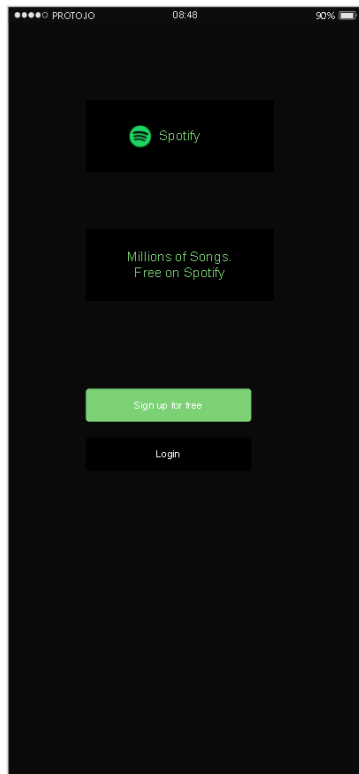

NAME: ALDRINE LINJOE S

ROLL NO:240701033

Design an application layout using different colors, text styles, and visual elements. Share the design with users through a Google Form or any other feedback collection method to gather their responses. Based on the feedback received, refine and improve the design accordingly.

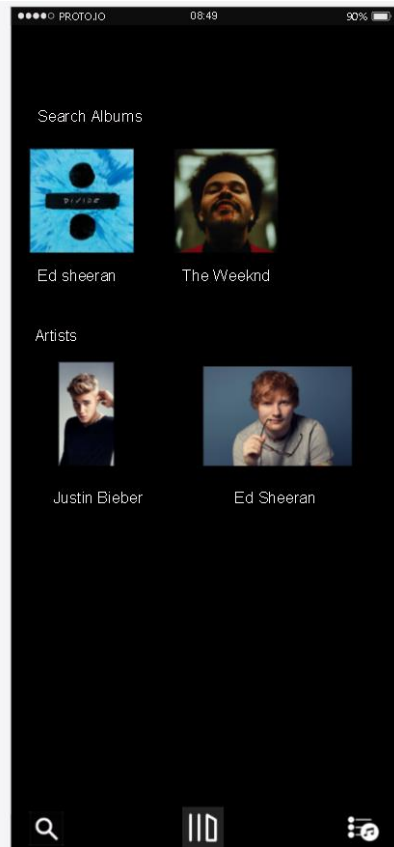

- Initially I have designed a application layout using different colors and visual elements.
- After that i have shared it to the users and asked for feedback
- Based on the Feedback I have improved the design

Screen 1:

This is the Login page screen I have used some colours, texts, buttons etc.

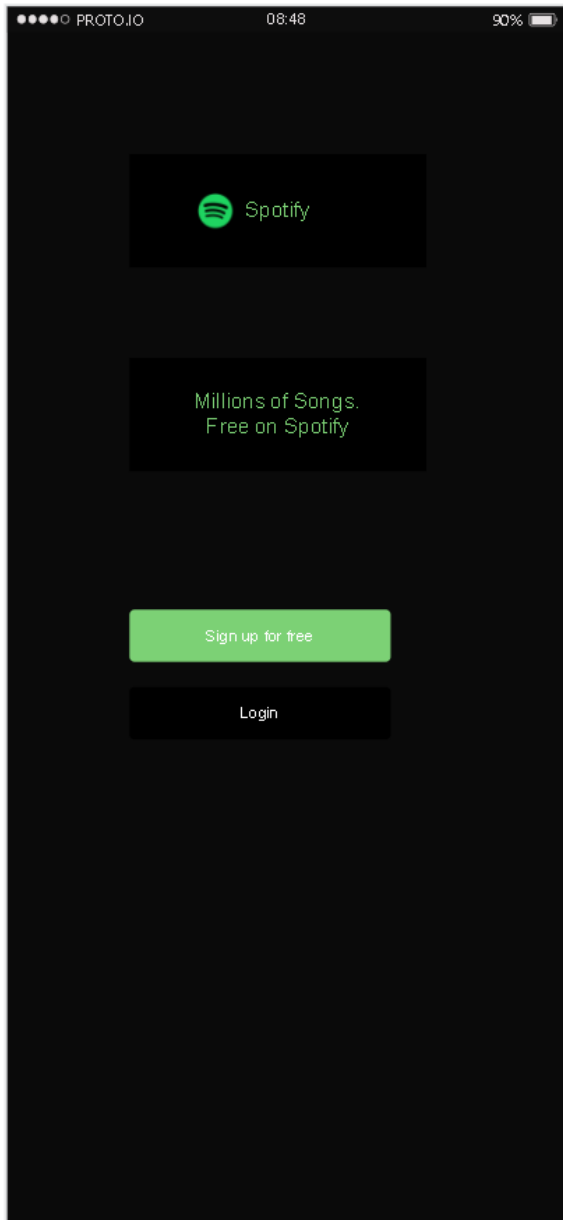

Screen 2:

This is the music discovery screen

After this I have created a google form and sent it to the users

Feedback From The User For HomeScreen:

What do you think about this design

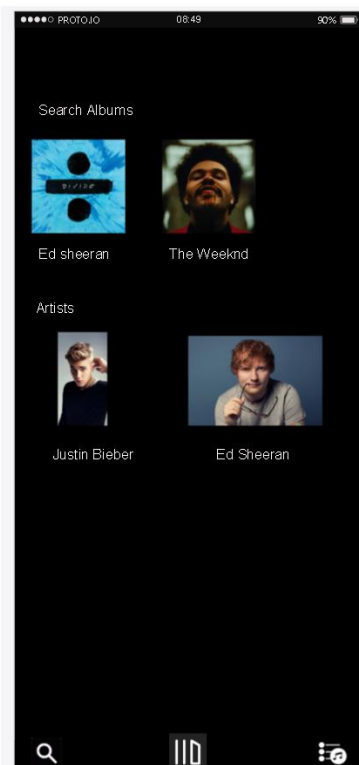

this design is minimalistic clean and easy to understand

Add individual feedback

Feedback From The User For Music Directory Screen:

Feedback

Albums

What Do You think about this design

from the image i cant able to understand it clearly it is too congested and cant understand what are you trying to say

Individual feedback

okay i will improve it

Here the user have suggested some tips for improving the design

Improved Design:
